

HOW TO INCREASE YOUR CHANCES OF WINNING THE LOTTERY

1. First thing to remember is that there are millions of people who are wishing to win the lottery.
2. Next thing to do is pick a date on which it's unlikely someone else has thought of wishing to win, like a specific date that the lottery is held nearest your birthday next year. Pick any date in the future, but make it out at least six months or more away.
3. Then remember that you have to buy a ticket for that particular drawing. Put a reminder on your calendar!
4. Read the wishing rules.
5. Remember you don't say please, you say thank you, which is an acknowledgment that the thing you are wishing for is already yours.
 - a. Thank you God for allowing me to win the lottery on the Saturday before my ___th birthday, which is on March 13, 2007.
6. Then remember to wish for everyone what you wish for yourself.
 - a. Every time someone else wins the lottery, thank God for that person winning, and add on to it that you wish for them to use their winnings wisely, and to find happiness in their lives.
7. Remember also that along with these wishes, you have unlimited wishes to come true for the rest of your life. Just always remember to say "thank you" before you see your wishes come true.
8. Remember some wishes take longer to come true than others.
9. If you need immediate financial help, then remember this: God is the Source of Your Supply. Keep this in mind always, and know that God wants you to be prosperous.
10. If you're in a desperate situation, read the 23rd Psalm, and if you're in danger read the 91st Psalm.
